Chapter II Transactions Concluded at Eurex Deutschland and Eurex Zürich (Eurex Exchange)

Part 2 Clearing of Future Contracts

2.8 [Deleted]

2.8.1 Payment Procedures

All payments are effected on the Business Day following the final settlement day (Number 1.8.4 of the Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich). All Clearing Members have to ensure their capacity to pay on the due date by a respective credit on the RTGS Accounts or on the euroSIC Account.

2.8.2 Final Settlement Price

(1) For the Euro Inflation Futures Contracts, the final settlement price shall be determined by Eurex Clearing AG on the final settlement day (Number 1.8.4 Paragraph 1 of the Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich) of a contract on the basis of the unrevised harmonised index of consumer prices of the Euro zone excluding tobacco (HICP) published by Eurostat on this day. The publication of the HICP shall be carried out on a regular basis during the calendar month following the calculation period.

(2) The final settlement price of a Euro Inflation Futures Contract shall be calculated in percent with four decimal places on the basis 100 minus the yearly inflation rate of
the 12-month period preceding the contract month (calculation period) of the 
unrevised harmonised index of consumer prices of the Eurozone excluding tobacco 
(also rounded to four decimal places). The formula to calculate the Final Settlement 
Price of the maturing contract month is as follows:

\[
FSP_t = 100 - (100 \times \frac{HICP_{t-1}}{HICP_{t-13}} - 1)
\]

(3) In case a publication of the unrevised harmonised index of consumer prices of the 
Eurozone excluding tobacco by Eurostat does not take place on the provided final 
settlement day or later than one calendar month after the relevant reporting period, 
the final settlement price (rounded to two decimal places) shall be calculated by 
means of the flash estimate of the inflation rate of the Eurozone including tobacco 
published by Eurostat (Monetary Union Index of Consumer Prices — MUICPY/Y) as 
follows:

\[
FSP_t = 100 - \left[ HICP_{Y/Y_{t-2}} + (MUICP_{Y/Y_{t-1}} - MUICP_{Y/Y_{t-2}}) \right]
\]

2.8.3 Fulfilment, Delivery

Open Positions of the last trading day shall be settled by a remaining amount which is 
credited to or debited from the internal cash account of the Clearing Member pursuant to 
Chapter I Part 1 Number 4.3. The amount to be entered shall be calculated on the final 
settlement day (Number 1.8.4 of the Contract Specifications for Futures Contracts and 
Options Contracts at Eurex Deutschland and Eurex Zürich) by means of the difference 
between the final settlement price of a contract and its daily settlement price of the 
previous Business Day, provided that the positions have already existed on the previous 
day. For positions opened on the last trading day, the amount to be entered shall be 
calculated by the difference between the final settlement price and the trading price. The
cash settlement pursuant to Sentence 1 shall then be carried out on the fulfilment day; this is the Business Day following the final settlement day.

**Clearing of Hurricane Future Contracts**

The following provisions shall apply to the Clearing of Hurricane Futures contract transactions specified in Number 1.13 of the Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich.

2.13.1 Payment Procedures

All payments shall be made on the Business Day following the final settlement day (Number 1.13.5 of the Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich). All Clearing Members must ensure their ability to effect payments on the due date thereof by having sufficient credit balances in the account arranged therefore.

2.13.2 Final Settlement Price

The final settlement price of Hurricane Futures contracts shall be determined by Eurex Clearing AG on the final settlement day (Number 1.13.5 of the Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich) of a contract.

(1) For Hurricane Futures contracts, the amount of damage indicated in a PCS report, with reference to a qualified event (Number 1.13.1 of the Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich) shall be relevant.
(2) The final settlement price shall be determined as follows:

The contract shall be settled with USD 10,000, if

a) a preliminary report of PCS for a qualified event indicates a damage amount which is equal to or higher than 110% of the respective allowance threshold, or

b) within 30 months upon beginning of the contract risk period—a final report of PCS indicates a damage amount which is equal to or higher than the respective allowance threshold, or

c) on the last Business Day of the 30th month upon beginning of the contract risk period—the most recent preliminary PCS report for a qualified event indicates a damage amount which is equal to or higher than the respective allowance threshold.

In all other cases, the contract shall be calculated on the final settlement day with a final settlement price of USD 0.10

2.13.3 Fulfillment

Open positions of the last trading day of a contract shall be settled on the Business Day after the final settlement day by a remaining amount which shall be credited to or debited from the internal cash account of the Clearing Member pursuant to Chapter I Part 1 Number 4.3. The booking amount shall be calculated on the basis of the difference between the final settlement price of a contract and its daily settlement price of the preceding Business Day. For positions opened on the last trading day, the booking amount shall be calculated on the basis of the difference between the final settlement price and the trading price
